1 Overview

Chargeback Gurus is a fintech company that provides end-to-end consumer transaction dispute management services to leading brands around the world.

Chargeback Gurus has recovered more than \$1.5 billion on behalf of its clients. The Gurus serve as trusted advisors to credit card networks and Fortune 500 companies, providing expertise in risk management, chargeback mitigation, fraud prevention, and dispute intelligence.

1.1 FPR 360

You can use the FPR-360 tool to track chargebacks in real time, recover revenue, identify vulnerabilities that lead to chargebacks, prevent chargebacks, and analyze merchant account chargeback risk.

The FPR-360 portal integrates with a payment processor, customer relationship management, and a gateway to collect all chargeback information. The evidence required to win the case is then compiled by our team of analysts and delivered to your bank.

1.2 Scope of document

This document aims to explain the process of onboarding for Airtel products including Airtel Broadband, Airtel Mobile, Airtel DTH services, and other products using FPR 360.

1.3 Text formatting in the document

The document is formatted as described below to highlight Notes, Tip, and UI text.

TEXT FORMAT	DESCRIPTION
Bold	The Bold format in the content refers to the UI text in the application.
NOTE/TIP	Text in this color refers to additional information supporting the actual content.
Hyperlink	Text in this color refers to a hyperlink linked within the document or outside the document.

2 Onboarding Process:

Chargeback Gurus need the following details to onboard any company:

- CRM or gateway integration
- Company details
- User details

NOTE: Airtel broadband, DTH, and mobile services can add their company and user details separately.

Chargeback gurus use this data to identify patterns and trends in chargebacks, determine the areas where chargebacks are occurring, and develop strategies to prevent chargebacks from occurring in the future.

2.1 CRM or Gateway Integration

If you use a CRM or gateway that is not on our integration list, we can integrate it for you. Our dedicated development team will complete the integration. Our FPR-360 system is fully customizable and can integrate with many systems.

We can start your integration within three business days after receiving all the necessary credentials.

We need to access the following information:

- **Payment Processor Chargeback Portal:** To access and dispute all your chargebacks.
- **Payment Gateway:** To collect transaction receipts.
- **CRM or Sales System:** To download invoices from a CRM or sales system.
- **Billing History:** To understand all your transactions.
- **Tracking Numbers:** To track all your chargeback data.

After the integration process is complete, you can add your company and user details.

2.2 Add a company

To add a new company to FPR 360, follow the steps below:

1. Enter the **Name** of the company.
In our case, **Airtel**.
2. Select the type of company from the list.
In our case, **Broadband**.
The options are:
 - **Broadband**
 - **Mobile**

- **DTH**
 - **Wholesaler**
3. Enter the valid **Address** of the company.
 4. Select the **State** of the company from the list.
 5. Select the **Country** of the company from the list.
 6. Enter the **Zip Code**.
 7. Enter the **Contact Number** of the company.
 8. Enter the valid bank **Account Number**, **Bank Name**, and **Branch** of the company.
 9. Click **Submit** to save the company details.

When you submit the company details, the system will redirect you to the "Companies" tab, where you will be able to see the newly added company. To add a new user, refer to the [Add a user](#) section.

2.3 Add a user

To add a new user to the company, follow the steps below:

1. Enter the **First Name** and **Last Name** of the user.
2. Enter the valid **Address** of the user.
3. Select the **State** of the user from the list.
4. Select the **User** of the company from the list.
5. Enter the **Zip Code**.
6. Enter the **Contact Number** of the user.
7. Click **Submit** to save the user's details.

TIP: To add other Airtel products and services, such as Airtel mobile and Airtel DTH, refer to [Add a company](#) section.

Once the onboarding process is complete, you can log in to the FPR 360 portal with your credentials.

The portal provides a dashboard that displays all the relevant information related to your chargebacks, recovered revenue, and chargeback prevention. You can also analyze the merchant account chargeback risk in real time.

2.4 Data storage and security

Chargeback gurus follow strict PCI compliance and collaborate with more than 2,200 merchants. Data security is a top priority. We handle your data securely because we connect via API; all the data we access is strictly kept confidential, and we do not share your data with any third-party agents. We do not collect all your customer data. We only collect information about your chargebacks.

2.5 Key points

- Chargeback Gurus need CRM or gateway integration, company details, and user details to onboard any company.
- Chargeback Gurus can integrate any CRM or gateway that is not on their integration list.
- Chargeback Gurus follow strict rules to keep data safe and secure and handle merchant data confidentially.
- Airtel can use this tool to onboard their Broadband, Mobile, and DTH services.
- Any company can onboard their service into FPR 360 using this manual.

3 Conclusion

Chargeback Gurus helps merchants manage chargebacks using their FPR-360 tool. The FPR 360 portal provides a user-friendly interface to track chargebacks, recover lost revenue, and analyze merchant account chargeback risk in real time.

Chargeback gurus follow strict rules to keep data safe and secure. Airtel can onboard their Broadband, Mobile, and DTH services using this tool. FPR 360 is a customizable tool that can integrate with existing systems.
